A Safety Leak Check inspection; such as a Gas Check, must be performed by a **Licensed Propane Dealer/Supplier** prior to the submission of any rebate application. An appropriate safety inspection consists of an on-site inspection - including any pressure tests, of an eligible installation by a **Licensed Propane Dealer/Supplier**. The purpose is to verify that the propane gas system, including all equipment, is installed in compliance with the appliance manufacturer's installation instructions and all applicable LP gas codes and regulations adopted by the state of Indiana. The purpose of the Safety Leak Check inspection validation is to support the IPGF Rebate Program and document that a safety leak check occurred as required under the rebate program.

To receive your rebate you must:

- Complete this 2017 Safety Rebate form.
- Include a copy of the paid receipt or invoice **(must be purchased in 2017)**
- Complete Safety Leak Check Validation Section.

Mail both documents to:
